

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

III. *The Figure of the Mustela fossilis; communicated from Dr. Gronovius at Leyden to Mr. Peter Collinson, F. R. S.*

Read March 12.
1746-7.

MUSTELA fossilis, sive Cobites cæruleus, lineis quinque nigris longitudinalibus. Arted. Ichthyol. gen. xi. 3. *. Vide TAB. II. Fig. 1.

This Fish was kept alive in a Jar of Water a Year wanting 9 Days, without changing the Water, and without any other Food than what the Water afforded. They dig them out of the Sands near *Wesel* in *Holland*.

IV. *Some Observations on the Belluga-Stone, by Mr. Peter Collinson, F. R. S.*

Read March 12.
1746-7.

THESE Stones of the *Belluga* were collected by Dr. *Cook* at *Astracan*, and sent to Dr. *Sanches* at *Petersburgh*, by whose Favour they came to me. I have applied to those Gentlemen to satisfy my Inquiries about them, and the Accounts they have communicated, with my own Observations, are as follows:

The *Calculus* of the *Belluga* is found of various Shapes and Sizes; it is mostly of a flattened oval Figure,

* Willoughby, *Hist. Pisc.* p. 124. TAB. G. 3, 4. Raii *Syn. Pisc.* p. 69.
